RE: LCG US Meter Consolidation

We Have Moved!

Dear Liquid Controls Sponsler Distributor,

On Monday, May 18th we officially transitioned the Liquid Controls Sponsler manufacturing operations to the Lake Bluff, IL. Obviously we would like to say it was as smooth as an early morning lake but we have tried to keep the ripples down to a minimum.

We are happy to announce that the machines have all been moved, are operational and that we are building product as evidenced in these photos.

All of the logistics such as inventory, purchasing, accounting and administration are now a function of our new location. The customer support team began fielding calls at 8 am on Monday, May 18th and has done a nice job handling the numerous inquiries.

Although the transition is not yet complete, it is very important to us to maintain clear lines of communication. You can continue to use the same phone numbers that you have always used for contacting Liquid Controls Sponsler, as we will keep these numbers active for the next several months. We recommend that you update your data for contacting Liquid Controls Sponsler to the following as soon as possible, as it will ensure your organization maintains trouble free contact with the factory.

For your reference our new phone numbers include

800-458-5262

847-295-1050

Use these numbers for all

- Application Assistance
- Availability
- Expediting
- Shipping Information
- Shipping Discrepancies
- Discount Information

Our new fax number

847-295-1057

Use this to fax in your orders

**Also any orders can be emailed to us at
lc-po@idexcorp.com**

Thank you for your support during this transition. We greatly appreciate the support we have gotten from you during this process and welcome any feedback.

Sincerely,

Bill

William R. Hughes
